

# Tracking Assets with Asset Tracking Module

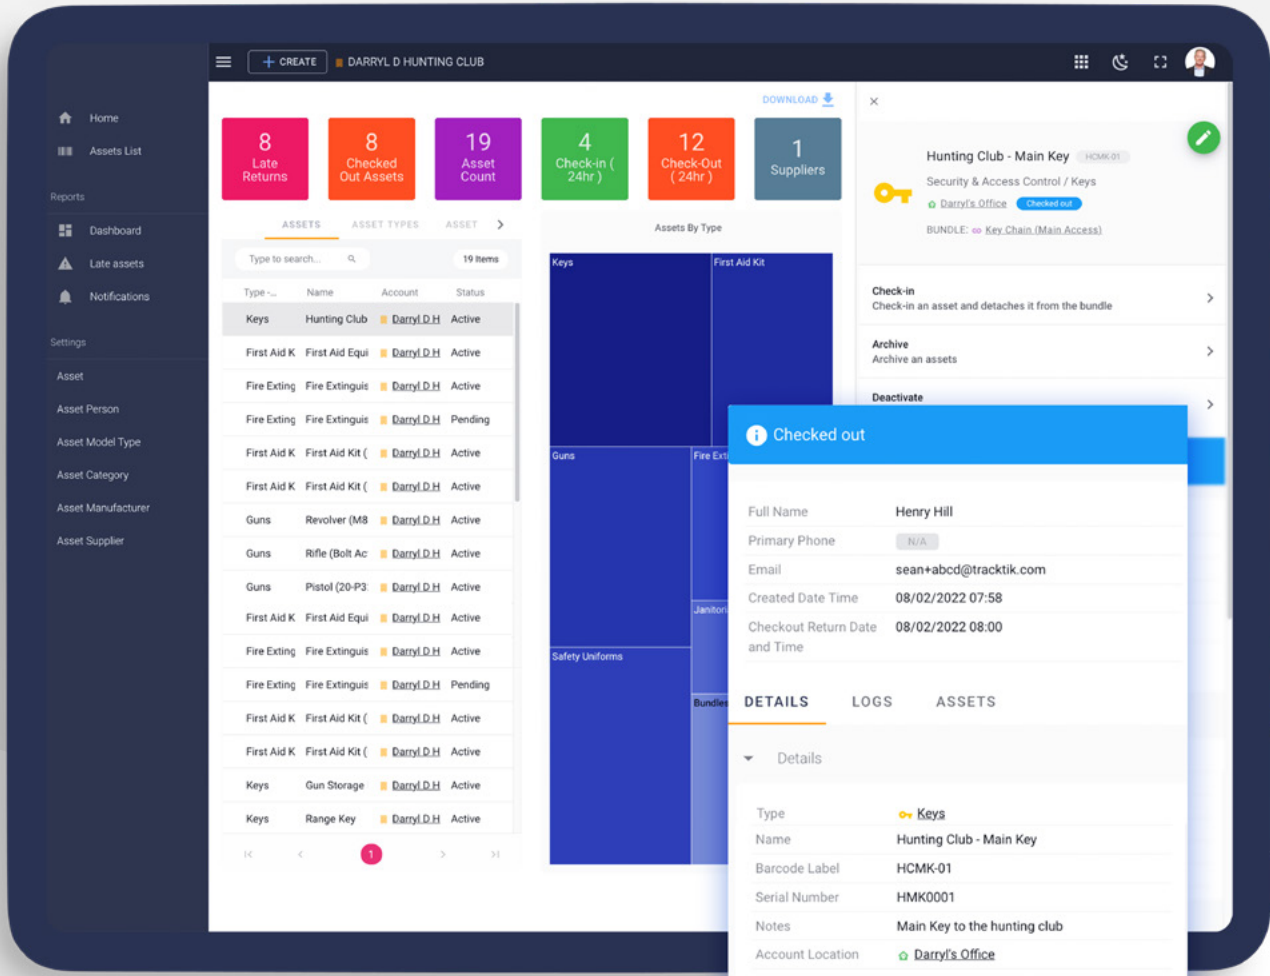

TrackTik is a cloud-based security workforce management solution that helps companies manage and track company assets such as keys, electronic devices, uniforms, and equipment. Asset Tracking is essential in order to ensure accountability and prevent losses. With TrackTik's Asset Tracking, you can also generate asset reports and analytics for key members of your organization. By contrast, using a manual tracking process, tracking assets becomes a time-consuming and error-prone task.

TrackTik's new Asset Tracking module works seamlessly to transform and simplify a large part of your Asset management process. With TrackTik's Asset Tracking, you will be able to:

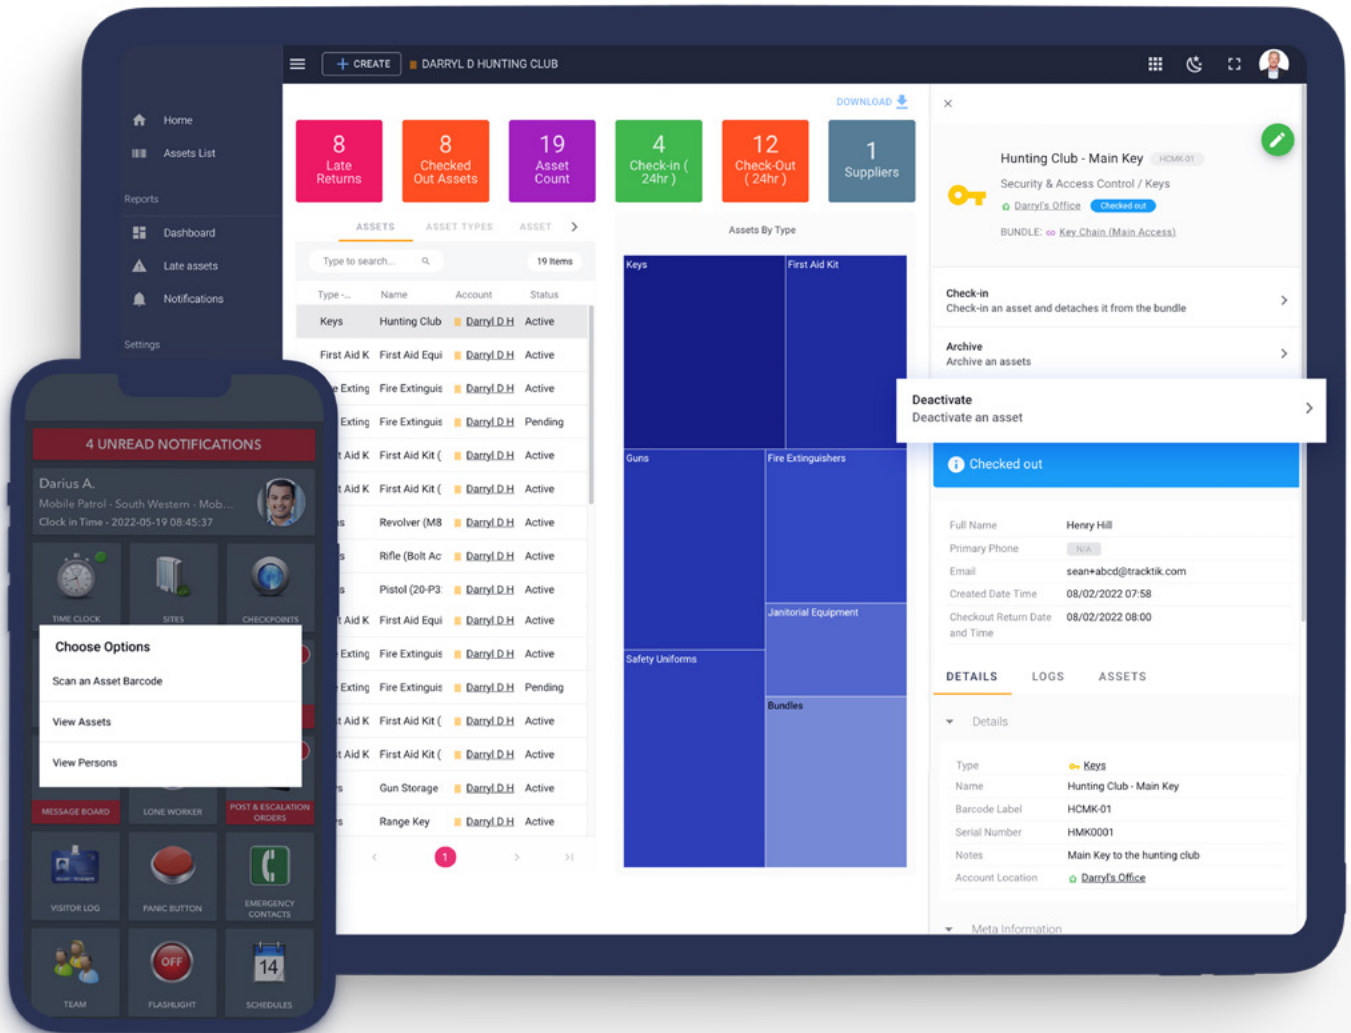

## Gain Real-time Visibility

- ✓ Use dashboards powered by Data Lab to drill down into your asset analytics and identify patterns related to usage, late returns, or losses
- ✓ Download asset reports that you can easily share with stakeholders to save time on building reports and enhance communication and transparency
- ✓ Simplify and speed up communications with SMS, email and push notifications to alert your team when an asset is not returned on time to help everyone stay aligned
- ✓ View asset status to identify what assets are available or unavailable and ensure your team is always well-equipped to perform their job

## Increase Accountability

- ✔ Document asset transactions along with details such as who checked the asset in or out, when, where and identify a due date for return in order to gain visibility on your assets at all times
- ✔ Link checked out assets to an employee, client, contractor or vendor to enhance accountability and facilitate tracking
- ✔ Make changes to asset information without compromising the integrity of asset history so that your information is up-to-date but you maintain full visibility on previous registrations

## Save Time & Reduce Losses

- ✓ Deactivate obsolete or damaged assets to eliminate confusion and view only the most up-to-date and relevant asset information
- ✓ Associate a barcode to your asset which can be scanned to reduce selection errors and speed up the retrieval process
- ✓ Import excel templates into the different asset modules to upload existing lists of assets in order to save time on manual entry and ensure accuracy

If you would like to learn more about how TrackTik can help you keep track of your assets like keys, electronic devices, uniforms, and equipment, please visit [tracktik.com](http://tracktik.com) or contact [sales@tracktik.com](mailto:sales@tracktik.com)

## About TrackTik

TrackTik was founded in 2013 and quickly established itself as a market leader with the mission to seamlessly connect humans, workflows, and systems to deliver a better way of working to the deskless workforce through relentless innovation and leading-edge software. Today, deskless workers represent 80% of the global workforce, and TrackTik strives to improve their lives by empowering them with thoughtful, cloud-based technology solutions, transforming the way they work. TrackTik's integrated suite of automated tools fluidly connects frontline operations and back-office management allowing managers to follow the progression of field workers, reduce manual tasks, lower cost, and demonstrate value. Headquartered in Montreal, Canada, with offices in the United Kingdom, TrackTik's seamless data-driven technology promotes operational efficiency and boosts deskless workers' productivity, job satisfaction, and retention. TrackTik manages more than 300,000 facilities worldwide.
